Welcome to Monaco

It is our great pleasure to announce details of the EAO's 32nd annual scientific meeting, which will take place from 18–20 September 2025. This year marks a return to Monaco, where we last gathered in 2009. The congress will be held in partnership with the French Society of Periodontology and Oral Implantology (SFPIO), and will reflect the two organisations' combined expertise and commitment to evidence-based practice.

Themed around **"The impact of time in implant dentistry"**, the congress will provide invaluable insights into the critical role of timing in successful dental implant treatment. This important topic has been selected to provide new insights and perspectives for daily practice.

The congress will feature an array of interactive presentations and live video sessions. This year, a new international dimension will be introduced as the second plenary will present the First Global Consensus for Clinical Guidelines in implant dentistry, a milestone document set to establish new standards for the field.

Monaco is a gem on the Mediterranean coast and the perfect location for a late summer congress. The meeting will be a unique opportunity to combine continuing professional development with networking, social events and culture.

On behalf of the scientific and congress committees, we extend a warm invitation to join us in Monaco. Don't miss this opportunity to share best practice in implant dentistry, hear about groundbreaking research, and shape the future of our profession. We look forward to welcoming you for an unforgettable event that promises to inspire, educate and connect.

Warmest regards,
